24th March 2005

Dear Sirs

ENVIRONMENTAL ASSESSMENT FOR PROPOSED DEVELOPMENT AT GLASGOW AIRPORT RAIL LINK

Thank you for your letter of 17th February 2005 asking what information should be provided in the environmental statement for the proposed development at Glasgow Airport.

Environmental Impact Assessments are concerned with projects which are likely to have significant effects on the environment. HSE's principal concerns are the health and safety of people affected by work activities. HSE cannot usefully comment on what information should be included in the environmental statement of the proposed development. However, the environmental statements should not include measures which would conflict with the requirements of the Health and Safety at Work etc Act 1974 and it's relevant statutory provisions.

We would advise that the Air BP depot at the airport is a major accident hazard which needs to be taken into account.

Yours faithfully

Mr. A. D. McNab
 HM Principal Inspector of Health & Safety
